

IP-SAKTI SAHAYAK

Architecture Triangle Diagram — Feature Revision Blueprint (SIH 2026)

Executive Summary: This document provides an authoritative guide on which features to **REMOVE** and **ADD** in the presentation triangle diagram for the **IP-SAKTI SAHAYAK** system. The revisions ensure the presentation accurately reflects the implemented hybrid Retrieval-Augmented Generation (RAG) architecture, the 5-Axis IP Risk Radar, statutory compliance engine, and legal evidence verification pipeline.

1. Features to REMOVE / REPLACE from Current Diagram

Current Item	Action Required	Rationale & Project Alignment
Human Expert Escalation	REMOVE	IP-SAKTI SAHAYAK is a 100% automated AI assistant. Instead of human routing, the system enforces Safe Abstention (refusing to answer when statutory evidence is insufficient).
Risk-Aware Guidance	REMOVE / REPLACE	Too vague and redundant. Replace this entry with the concrete, flagship 5-Axis IP Risk Radar assessment module.
Version-Tracked Laws	RENAME	Rename to Authoritative Source Registry & Regulatory Monitor to accurately reflect the live source prioritisation pipeline (IP India, AYUSH, TKDL, WIPO, NBA).

2. Core Implemented Features to ADD to Diagram

Feature Name	Target Triangle Level	Description & Implementation Value
Innovation Analyzer & 5-Axis IP Risk Radar	PRIMARY FUNCTIONS (Level 2)	Flagship evaluation engine analyzing Traditional Knowledge (TK) overlap, Sec 3(d)/3(p) statutory novelty hurdles, and NBA/ABS compliance.
Prior-Art Search Engine	PRIMARY FUNCTIONS (Level 2)	Hybrid FAISS (bge-m3) + BM25 search across IP India, WIPO, and TKDL databases with rank cross-encoders.
Document Analyzer	PRIMARY FUNCTIONS (Level 2)	Deep analysis of uploaded patent specs and research papers for non-patentability and compliance warnings.
Interactive Knowledge Graph	PRIMARY FUNCTIONS (Level 2)	Interactive visualization mapping connections between Ayurvedic formulations, plant species, and statutory sections.
PDF / HTML Dossier & Report Generator	MONITORING & SUPPORT (Level 4)	Generates downloadable, audit-ready intelligence reports with full source citations and statutory legal disclaimers.

3. Recommended Revised Triangle Hierarchy Blueprint

Pyramid Tier Level	Recommended Components & Text for Presentation Diagram
APEX LAYER (Core Feature)	Citation-Grounded Ayurvedic IP & Regulatory AI Assistant

TIER 2 (Primary Functions)	• Jurisdiction-Aware RAG • Innovation Analyzer & 5-Axis IP Risk Radar • Prior-Art Search Engine (TKDL / WIPO / IP India) • Document Analyzer & Interactive Knowledge Graph
TIER 3 (Safety & Compliance)	• Source-Cited Answers (Verified citations linked to evidence) • Confidence Scoring + Safe Abstention Gate • Statutory Legal Disclaimer & Secure Data Handling
TIER 4 (Monitoring & Support)	• Authoritative Source Registry (AYUSH / NBA / IP India / WIPO / WHO) • Multilingual Chat Support (English, Hindi, Odia) • Source Freshness Monitoring • PDF / HTML Intelligence Dossier Generator
